FAJAR FAISAL
E – mail: fajar_faisal@outlook.com
Canadian Citizen. Eligible to work in Canada

SUMMARY

Technology Business Management graduate with hands-on experience in data analysis, business intelligence, and stakeholder reporting. Proven ability to transform raw datasets into actionable insights using Power BI, SQL, Tableau, Excel, Python, and R, while supporting decision-making through clear documentation and presentations. Strong collaborator with experience coordinating team tasks, validating data accuracy, and translating technical findings for non-technical stakeholders.

SKILLS

Data & Business Intelligence

- Power BI, Tableau, Excel (PivotTables, VLOOKUP, advanced formulas)
- Dashboard development, KPI tracking, reporting, data validation

Data Analysis & Technical Tools

- SQL (queries, joins, aggregations), Python (Pandas, Matplotlib), R
- Data cleaning, transformation, EDA, basic database DML
- Data migration and workflow documentation

Business & Collaboration

- Stakeholder communication, requirements support
- Documentation, user guides, training materials
- Quality assurance, accuracy checks, compliance awareness

EDUCATION

University of Ontario Institute of Technology **Sep 2021 – July 2025**

Business Technology Management - Bachelor of Information Technology (Honors).

Donar Award Scholarship (4×) | Enbridge Gas HEA Program Scholarship (4x) | 2021-2022 Honor Roll List

EXPERIENCES

1) Data Analyst Extern – TruBridge Healthcare (Remote) **Sept 2025 – Nov 2025**

- Performed exploratory data analysis on publicly available healthcare datasets to identify infection trends across demographics, case counts, and time-based patterns.
- Utilized AI-assisted analytics (ChatGPT, ClaudeAI) to support data discovery, generate research hypotheses, and develop dashboards, visualizations, and analytical reports.
- Delivered synthesis reports and presentations highlighting key trends, data limitations, population-level insights, and actionable public health recommendations for stakeholders.

2) Data Analyst – Capstone Project, SmartCone Inc. (Remote) **Jan 2025 – April 2025**

- Collected and transformed raw sensor data using Excel and SQL, supporting data cleaning, migration, and analysis within the ZIM database environment.
- Identified key system trigger points and contributed to defining functional system requirements based on data trends.
- Conducted multiple validation and testing cycles, ensuring data accuracy and reliability prior to stakeholder review.

- Presented weekly findings and progress updates to stakeholders through meetings and written communications.
- Developed user documentation, onboarding materials, and tutorials, improving internal adoption and client understanding of system outputs.
- Coordinated team tasks and maintained structured reporting to support informed decision-making.

CERTIFICATIONS

- *Google Data Analytics Professional Certificate — Google, 2025*
    - Gained hands-on experience in data cleaning, SQL querying, spreadsheet analysis, R programming, data visualization, and communicating data-driven insights.

- *Google Business Intelligence Professional Certificate — Google, 2025*
    - Developed skills in building dashboards, modeling data, analyzing business metrics, and delivering insights using BI tools to support data-driven decision-making.

- *Health Informatics Specialization — Johns Hopkins University, 2025*
    - Gained foundational knowledge in health informatics, electronic health records, healthcare data workflows, data quality, privacy, and the use of data to support clinical and public health decision-making.

PROJECTS

1) IBM HR Analytics (Python)

- Analyzed employee attrition, compensation, demographics, and tenure to identify workforce trends and retention risks.
- Translated complex datasets into clear insights to support workforce planning decisions.

2) Public Health Surveillance Dashboard (R)

- Built an interactive COVID-19 analytics dashboard using public health datasets.
- Analyzed trends in case counts, mortality, and regional spread to support public health insights.

3) Enrollment Analysis (Power BI)

- Developed KPI-based dashboards to analyze trends and support strategic planning decisions.
- Examined five-year enrollment data to identify retention risk indicators.
